

## 656524 Sizzix® Bigz™ Die - Pinwheel

1. Die-cut Pinwheel from chosen material. Curl each of the corners that have holes in them.

2. Use a large brad (if the Pinwheel is decorative) or a thumb tack (if you want a working Pinwheel) to connect the four corners with holes.

3. After the holed corners are all together, push the brad or thumbtack through the hole in the center of the Pinwheel.

4. The Pinwheel can be glued to a straw, or if you are using a thumbtack, it can be pushed into a dowel or even a pencil.
