

# 658235 Sizzix® Bigz™ Pro Die - Bag, Caddy by Jen Long-Philipsen

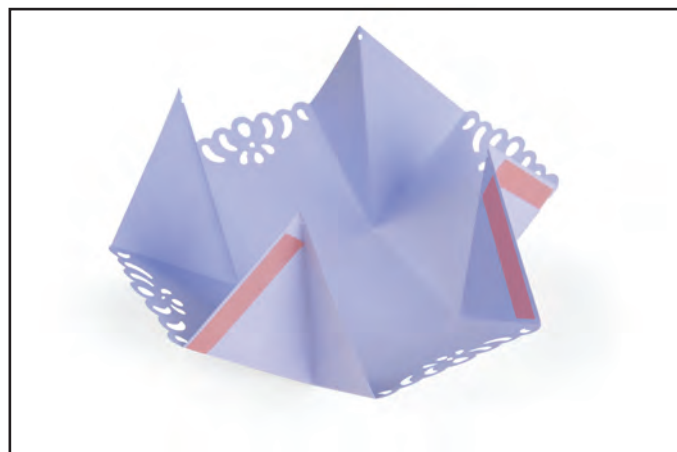

1. Die-cut from desired material and fold on all creases as shown.

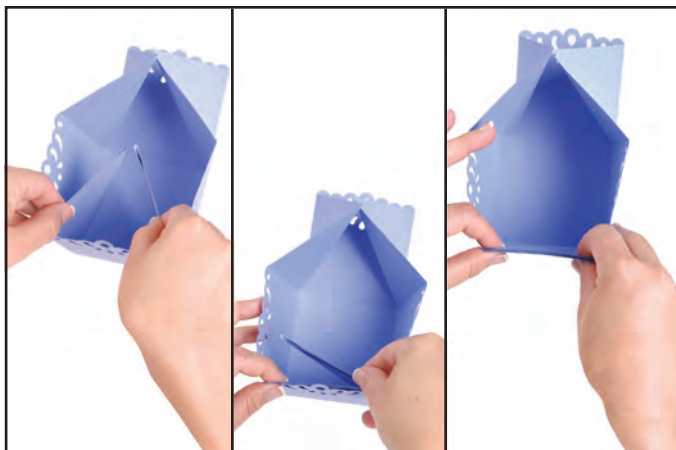

2. Lace string, twine or ribbon through the four corner holes.

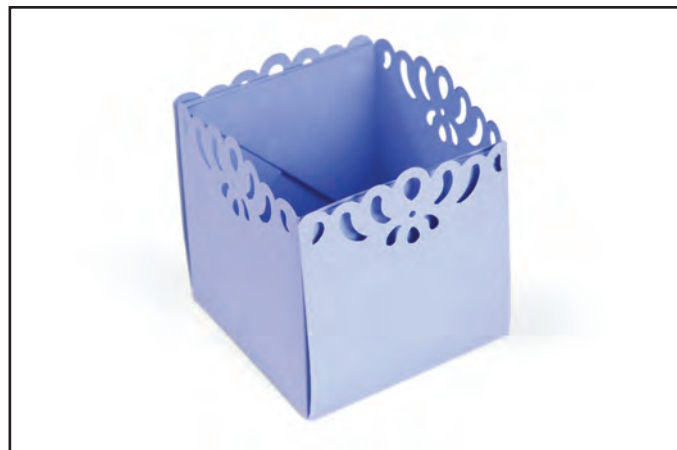

3. Draw the strings and corners together to create the finished Caddy.

4. Create an alternative box by applying adhesive to both sides of the projects as shown.

5. Close the corners to create flaps. Fold the left flap down first, then adhere the second flap to the back of the first.

6. Repeat step 5 on the opposite side of the box to complete the finished project.
