

658406 Sizzix® Thinlits™ Die - Flower, Forsythia by Susan Tierney Cockburn

1. Die-cut all Petals out of golden yellow cardstock.

2. Use the small stylus to push the Flowers out of the paper and **cup** them to give dimension.

3. Pick up the individual Flowers with tweezers and add a small amount of glue to the underside of each.

4. Adhere Flowers to brown paper-wrapped wire.

5. **Stem** and **vein** leaves on leaf pad, then **pinch** and **bend** as shown. Dip the stem ends into the glue and adhere to the base of the branch. To add further detail, use a toothpick, lightly dipped into the glue, and dot each one of the flowers. Sprinkle Woodland Scenics™ Pollen over the glue to add definition.
