

658411 Sizzix® Thinlits™ Die - Flower, Rose by Susan Tierney-Cockburn

1. For the flower, die-cut petals from desired cardstock color six to eight times. For the bud, die-cut petals once. Die-cut leaves, stem and calyx (Flower base) one time each from green cardstock. **Shape, pinch and bend** the petals to add dimension.

2. **Stir** the calyx into a slight cup. Add large petals with a small amount of glue, starting from the outside and moving toward the center, offsetting each petal.

3. To create the bud, **shape** the petal, then hold the petal by the rounded edge with tweezers and **roll** toward the straight edge. Apply a small amount of glue along the inside of the straight edge and seal. **Bend** the outside edge as desired.

4. Add a small bit of glue to the bottom of the center bud and adhere it to the center of the calyx. Continue by adding the smaller petals around the bud, then filling out the blossom with medium and large petals.

5. **Stem, vein, pinch and bend** each leaf. Tuck under Flower and adhere.

6. For a budding Rose, fold the tab of the long calyx, add a small amount of glue to the tab, **roll** up and seal. **Bend** the "arms" of the calyx outward from the center

658411 Sizzix® Thinlits™ Die - Flower, Rose by Susan Tierney-Cockburn

7. To create the bud, **shape, roll** and **bend** the “bud” petal, as described in step 3.

8. Add four small petals around counter-clockwise from the bud, adding a small amount of glue to hold each petal. Add additional medium and large petals as desired. Dip the end of the completed bud into glue and place it inside the long calyx.

9. **Stem, vein, pinch** and **bend** the tri-leaf. Tuck under Flower and adhere.
