

658737 Sizzix® Bigz™ Die - Chandelier Ornament by Brenda Walton™

Die-cut multiples of desired pieces from chosen material. (Xyron instructions: run paper through Xyron prior to cutting.)

Fold each piece along the center score line. Use a burnisher to flatten the fold line. Four panels have been used for the purpose of instruction, however, the more panels used, the fuller the finished project.

To create the body of the Ornament, use quick-dry glue to adhere two panels together by lining up the mirrored sides of each. Use paperclips to hold panels securely in place while drying. Continue adding panels until Ornament reaches desired fullness.

Prior to adhering the final panel in place, position a piece of string down the center of the Ornament and glue in place. Then adhere the final panel to hold it in place. With a fuller project made of many panels, you may wish to pre-attach your center decoration to the string.
