

659246 Sizzix® Bigz™ Die - Mini Cupcake Stand by Brenda Walton™

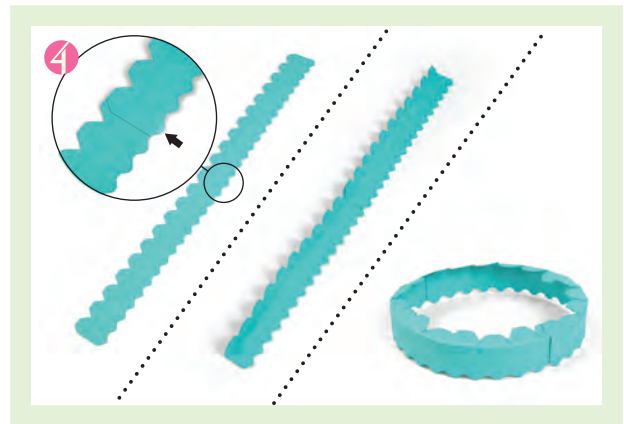

1. Die-cut from desired material.

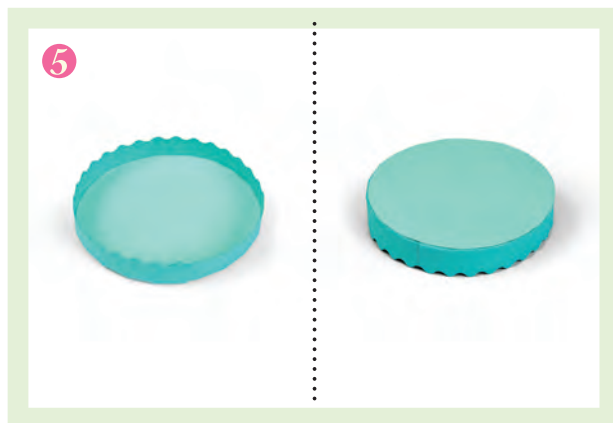

2. Fold four pedestal pieces down center and apply adhesive to the same side of each. This will ensure that the tabs on the top of each section are facing the same way.

3. Adhere the pedestal pieces together to create the Cupcake Stand base.

4. Link two trim sections together by aligning the first scallop on each end (not the tabs). Fold down the center and complete a loop by joining the open ends together.

5. Apply adhesive to the outside edge of one of the round cut-outs and place inside the skirt. Flip the platform over and apply the finished circle to the top.

6. Apply adhesive to the four tabs on the top of the pedestal and adhere the Cupcake Stand base to the platform. Embellish as desired.
