

1. Die-cut from cardstock

2. Twist and adhere the outer strips together to form corners as shown.

3. In this image, all four corners have been created on both pieces

4. Position both pieces opposite of each other and rotate until the center strips of the one aligns with the corners of the other. Adhere the end of each center strip to the inside of it's corresponding corner. Make sure to keep the strip back far enough so that it does not overlap the point of the corner.
