

1. Die-cut from matboard

2. Form the body of the box by adhering the tabs of the side piece to the bottom of the box foundation as shown. The first and last tabs meet in the double wide section of foundation piece.

3. Adhere one of the scalloped pieces to the bottom (closed end) of the box.

4. Attach the hinge to the inside of the box, on the double wide section. Adhere the remaining scalloped piece to the hinge as shown. Embellish as desired.

5. A double box can be created by assembling two box bodies and adhering the hinge to the outside of the double wide section as shown.
