

660315 Sizzix® Bigz™ XL Die - Box, Sewing by French General

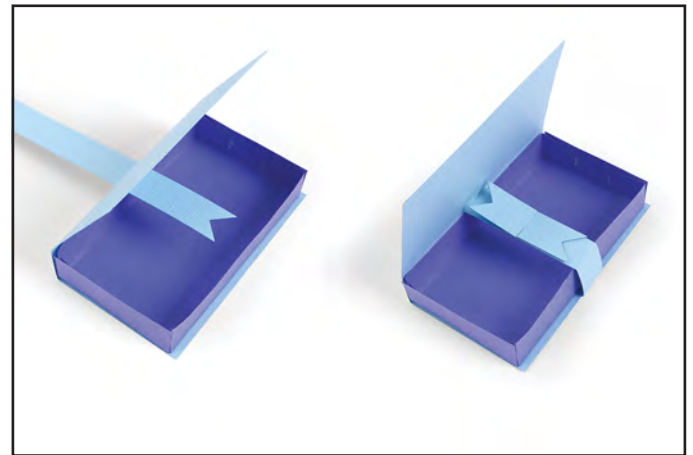

1. Die-cut from desired material.

2. To form the base, fold all creases in the same direction. Apply adhesive to the side tabs and adhere them to corresponding sides as shown.

3. The lid works much like a book cover. Fold all the creases of the wrap-around lid in the same direction. Adhere the base of the Box to the bottom flap and the long edge of the base to the spine or center section of the top. Be sure that the slit in the lid aligns with the top edge of the base.

4. Insert the retaining strap through the slit in the lid. Wrap the tail of the strap around the Box and lock the two slits of the strap together as shown. Embellish as desired.
