

660668 Sizzix® Originals™ Die - Box, Christmas Tree by Jen Long

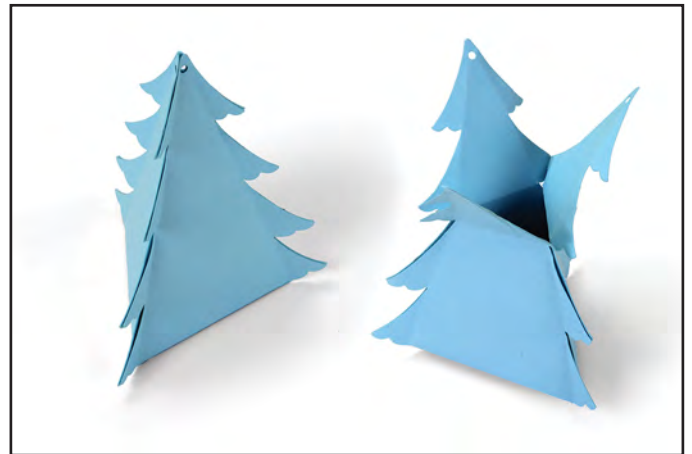

1. Die-cut from desired material, and apply adhesive to bottom tab of each side section. All embellishments will go on the side opposite the adhesive.

2. Fold bottom tab inward with the adhesive facing up. Fold the tree branches outward, opposite the bottom tab.

3. Adhere all three sides to the triangular bottom.

4. At this point you have the option of adhering all of the branches together or leaving the top two tiers of branches open so that the ornament can be filled.

5. Finish off the tree with a ribbon or string laced through the hole at the top.
