

661554 Sizzix® Thinlits™ Die Set - Snowflake Diamond Box by Lindsey Serata

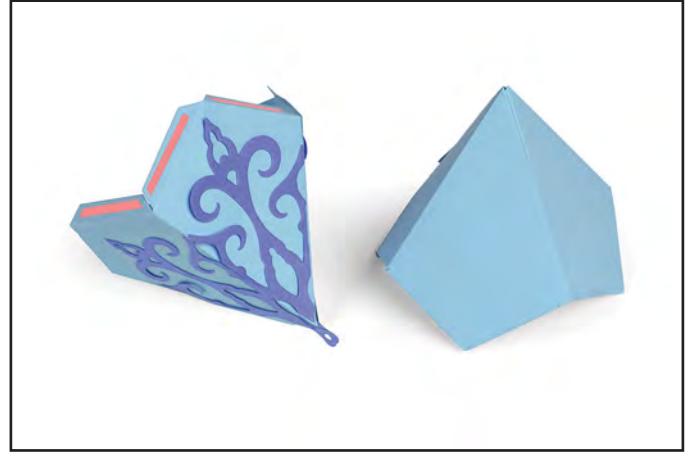

1. Die-cut four body pieces and selected ornamentation from desired material.

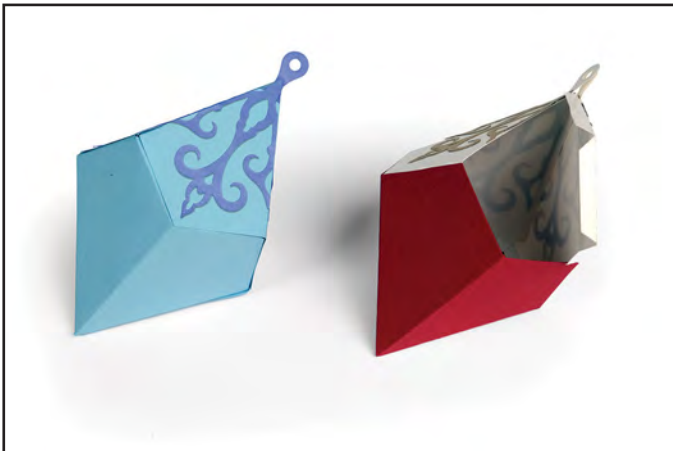

2. Apply adhesive to the long tabs of each body piece and adhere two body pieces together. One pair will become the bottom of the ornament and the other the top. Using scissors, remove all of the small tabs from what will become the bottom of the ornament.

3. Apply adhesive to all of the small tabs of what will become the top of the ornament.

4. Create the top and bottom cones by adhering remaining long tabs to corresponding opposite sides. Adhere two of the hanger pieces to opposite panels of the top cone, then apply desired embellishments.

5. Adhere the top cone to the bottom cone. Ornament can also be used as a favor box by simply not using adhesive on the long tab and the two nearest small tabs. This allows the panel to open and close as shown.
