

661879 Sizzix® Thinlits™ Die Set - Invitation Wrapper by David Tutera™

1. Die-cut from desired material. Note that the intricate doors are not mirror images. Cut both in the same direction so that when opposite each other, the center clasps will interlock.

2. Fold the doors along the straight edges, and apply adhesive to the inside of the fold as shown.

3. Add holder tabs to the top and bottom edges of the back of the Invitation Wrapper by placing the tab die approximately 1/8" (3mm) from the edge, with the top of the arch facing inward toward the center of the panel.

4. Adhere the edges of the doors to the back of the Invitation Wrapper. Align the folded edge of the butterfly with the straight edge of one of the clasps, and adhere in place. Insert the invitation between the tabs.

5. Lock the doors by interlocking the center clasps beneath the butterfly.
